Alicante

TECHNICAL SKILLS

- **Programming:** C++ / C# / Python / Java
- **3D modeling:** Unreal / Meshlab / Blender
- **ML/IA:** TensorFlow / Keras / NumPy
- **Databases:** MySQL / MongoDB
- **Developping:** Optimization, debugging, systems architecture

EDUCATION

- **Computer Engineering**
University of Alicante
2019-2025
- **Computer engineer**
(exchange program)
Mahidol University
International College
2023
- **Languages**
Spanish (native)
French (native)
English (Cambridge B2)

PROFESSIONAL PROFILE

Junior computer engineer with professional experience in .NET development and practical specialization in computer vision and 3D reconstruction.

I stand out for my fast learning, analytical thinking and initiative to solve technical challenges with practical solutions. I work effectively in teams and communicate fluently in bilingual environments. I seek to add value from day one and grow in the technology sector.

WORK EXPERIENCE

- **JUNIOR PROGRAMMER (INTERNSHIP)**

NTT Data 2024 (6 months)

- Developed and maintained .NET features for a payment gateway product.
- Contributed to new functionality related to Google Pay and Apple Pay integrations.
- Worked on technical issue resolution and practical feature delivery in a professional software team.

PERSONAL PROJECTS

- **3D RENDERING WITH**

- **GAUSSIAN SPLATTING**

- Built an end-to-end pipeline that combines COLMAP, SAM-based segmentation and Gaussian Splatting to generate 3D representations from 2D images.
 - Developed Python tooling to convert calibrated datasets into COLMAP and LichtField Studio format, including camera setup, poses and subject masks.
