Alicante

TECHNICAL SKILLS

- **Programming:** Python / C++ / C# / Java
- **CV & 3D:** COLMAP / Gaussian Splatting
- **ML & tools:** PyTorch / OpenCV / NumPy
- **Databases:** MySQL / MongoDB
- **Strengths:** Optimization, debugging, experimentation

EDUCATION

- **Computer Engineering**
University of Alicante
2019-2025
- **Computer engineer
(exchange program)**
Mahidol University
International College
2023
- **Languages**
Spanish (native)
French (native)
English (fluent)

PROFESSIONAL PROFILE

Computer Engineer with professional experience in .NET development and a strong specialization in computer vision and 3D reconstruction.

I own the full pipeline: capture, camera calibration, training and real-time GPU rendering. A fast learner, analytical and effective in bilingual teams, I want to keep growing in computer vision and software development.

WORK EXPERIENCE

• JUNIOR PROGRAMMER (INTERNSHIP)

NTT Data 2024 (6 months)

- Developed and maintained .NET features for a payment gateway product.
- Contributed to new functionality related to Google Pay and Apple Pay integrations.
- Worked on technical issue resolution and practical feature delivery in a professional software team.

PERSONAL PROJECTS

• 3D RECONSTRUCTION WITH GAUSSIAN SPLATTING

- Built an end-to-end pipeline that combines COLMAP, SAM-based segmentation and Gaussian Splatting to generate 3D representations from 2D images.
- Developed Python tooling to convert calibrated datasets into COLMAP and LichtField Studio format, including camera setup, poses and subject masks.
